asvin CTI HORIZON™

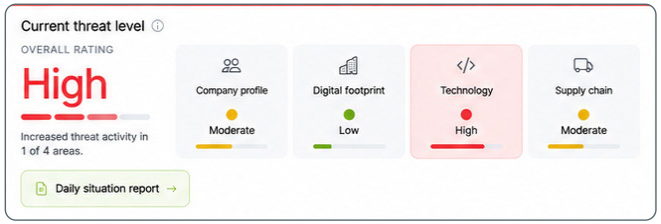

FROM INFORMATION TO RELEVANCE

Understand your cyber landscape. Make forward-looking decisions.

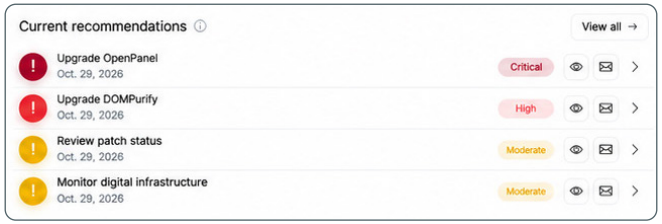

AI accelerates threats and adds to information overload. CTI HORIZON uses AI to match public threat information (OSINT) with your business context and create a prioritised cyber situational overview.

Your team identifies what matters faster – and takes targeted action.

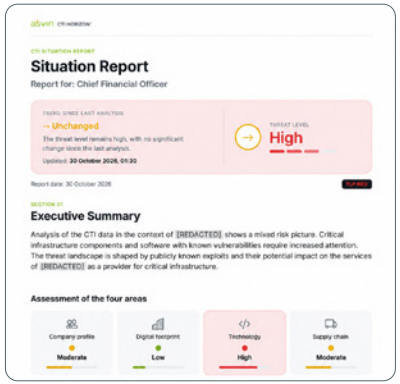

Risks at a glance
See which areas of your organisation need particular attention.

Prioritise action
Context-based recommendations show your team where to focus first.

Spot changes early
Track how the threat landscape evolves and identify changes.

Insights tailored to each role
The situation report presents risks and recommendations clearly, tailored to each recipient.

GET YOUR FIRST CYBER SITUATIONAL OVERVIEW FAST, WITHOUT A COMPLEX INTEGRATION PROJECT..

From day one: Assess threats. Prioritise checks. Make informed decisions.

Which cyber threats are relevant to you right now?

Let's discuss your needs and explore how CTI HORIZON™ can help.
